

Use Transaction Control

If your financial institution is enrolled in Transaction Control, your cardholders can place TCBs (and unblock TCBs they've placed) by following the steps below:

Step	Screen
<p>1. In the SHAZAM BOLT\$ app, the cardholder taps Card Actions and then Transaction Control.</p>	 <p>The screenshot shows the SHAZAM BOLT\$ app interface. At the top, there's a status bar with 'Verizon', '2:34 PM', and '36%' battery. Below that, the app logo 'SHAZAM BOLT\$' and 'Zeta Bank' are visible. The main screen is titled 'Card Actions' and shows a list of options: 'Modify Expiration Date', 'Remove Card', 'Modify Alert Settings', 'Send Money', 'Transaction Control', and 'Done'. The 'Transaction Control' option is highlighted.</p>
<p>2. The cardholder taps the slider to change the TCB status of the card.</p> <p>If there is no block, the cardholder taps the slider to block.</p> <p>If the card has been blocked by the cardholder previously, the cardholder taps the slider to unblock.</p> <p>A cardholder can't unblock a block placed by your financial institution. If the card has been blocked by your financial institution, he or she must contact your financial institution with questions.</p>	<p>No Block</p>  <p>The screenshot shows a 'Temporary Card Block' slider that is currently turned off, with the text 'Not blocked' below it.</p> <p>Block Placed by Cardholder</p>  <p>The screenshot shows a 'Temporary Card Block' slider that is currently turned on, with the text 'Blocked by you' below it.</p> <p>Block Placed by Financial Institution</p>  <p>The screenshot shows a 'Temporary Card Block' slider that is currently turned off, with the text 'Blocked by your financial institution' below it.</p>

Warning: The cardholder block can be removed by the cardholder at any time, possibly placing the card at risk for fraud. If you suspect fraud, remove the cardholder's card block using SHAZAM Access, and then add your own TCB.

Card Use When a Card is Blocked

TCBs placed using Transaction Control work the same way they do when your financial institution places a TCB. In addition to transactions not working, some of the features of SHAZAM BOLT\$ and SHAZAM P2P won't be available. The lists below describe what actions are available and unavailable when a card is blocked:

The cardholder can...	The cardholder can't...
<ul style="list-style-type: none">• Get alert settings• Modify alert settings• Add or remove a card	<p>SHAZAM BOLT\$ Functions</p> <ul style="list-style-type: none">• Use the Forgot Password function• Get balances using SHAZAM BOLT\$• Add a new device• Send money <p>Other Functions</p> <ul style="list-style-type: none">• Complete monetary transactions (for example: purchases, withdrawals, deposits, etc.)• Get balances at ATMs• Select a PIN using Easy PIN• Activate a card
